We saw that the family is the basic unit or building block of human organization

The society is the next larger order

Society is composed of many families living together making collective effort for a common goal

We will explore a society that ensures living in harmony with the entire nature:

1. Goal of human being living in society (human goal)
2. The dimensions or systems required to achieve the human goal
3. Scope of the systems (in the next lecture)

Identification of Human Goal

- Are all 4 required, desirable or we can leave something out?
- If all 4 are achieved, would anything else be required?
- Are we working for all 4? In the family? In the society?
- What would be the sequence and priority of effort on these goals?
